☐**Equivalent blur as a function of spurious response of a sampled imaging system: application to character recognition**

- JOSA A, Vol. 16 Issue 5, pp.1026-1033
- Driggers, Ronald G; Vollmerhausen, Richard; O'Kane, Barbara
- Image sampling effects have been variously quantified as aliased signal, spatial signal, and spatial noise. However, a relationship between these characteristics and human object...

☐**Binary Zone-Plate Array for a Parallel Joint Transform Correlator Applied to Face Recognition**

- Applied Optics, Vol. 38 Issue 14, pp.3060-3067
- Kodate, Kashiko; Hashimoto, Asako; Thapliya, Roshan
- Taking advantage of small aberrations, high efficiency, and compactness, we developed a new, to our knowledge, design procedure for a binary zone-plate array (BZPA) and applied it to...

Refine search for abstract: **character recognition** , year: **1990 - 2002****Frequent OCIS Categories:**

Diffraction and gratings
Binary optics **(1)**
Fourier optics and signal processing
Fourier optics and signal processing **(1)**
Fourier optics and signal processing
Pattern recognition **(1)**

Frequent Journals:

JOSA A **(1)**
Applied Optics **(1)**
